# ABB HIEE300550R1 PPB022 CEV01

## Processor Board

ABB HIEE300550R1 PPB022 CEV01 is a processor-board assembly for spare-part identification and replacement enquiries. ABB identifies the HIEE300550R1 ordering code as PP B022 CE, processor board, while the photographed unit carries the CEV01 designation. This listing retains that complete identification so purchasing and maintenance teams can compare the offered board with the installed part. It is a board-level item rather than a complete control system.

The photographs identify the supplied board and its markings. Use the complete order code and version on the label when ordering.

## Compatibility & Selection Guide

ABB lists HIEE300867R0001 (PP B022 DE01) as the replacement for HIEE300550R1. The DE01 record identifies the board as a PSR CPU and specifies compatibility with older CE-type CPUs. Its technical note names CE-type code 58067725 and its replaced-product list also names HIEE300550R1.

ABB requires ABB CHIND to load the software on the DE-type replacement. Confirm the installed CEV01 CPU identification and application software with ABB before arranging the exchange.
